This Article Applies to: ♥

Step 1

Open the web browser and in the address bar type in:

http://192.168.1.1 or **http://192.168.0.1** or **http://tplinklogin.net**

Then press **Enter**.

A screenshot of a web browser's address bar. The text 'http://192.168.1.1' is entered. To the right of the text is a dropdown arrow and a green 'Go' button with a right-pointing arrow.

Note:

The LAN IP is vary by model. Please find it on the bottom label of the product.

Step 2

Type the username and password in the login page. They are both **admin** by default.

A screenshot of a login window titled 'Connect to 192.168.1.1'. The window has a blue header with a key icon. Below the header, there is a 'TP-LINK' label. The 'User name:' field contains 'admin'. The 'Password:' field is masked with dots. There is a checked checkbox labeled 'Remember my password'. At the bottom are 'OK' and 'Cancel' buttons.

Step 3

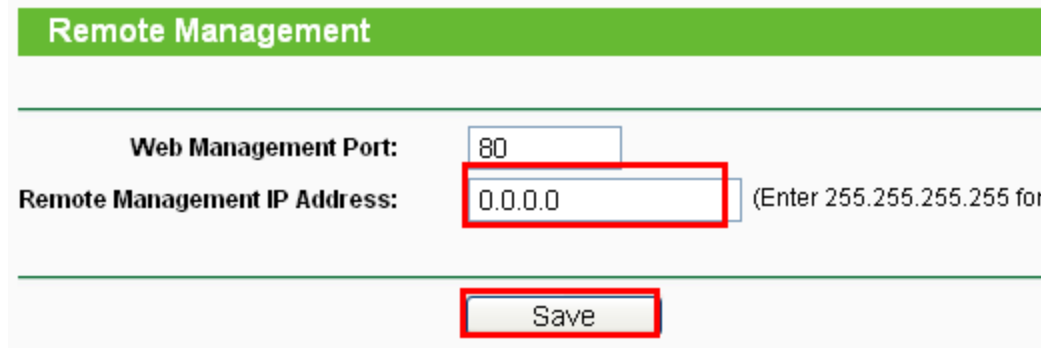

Click **Security->Remote Management** on the left side.

Step 4

With the default setting (Port 80 and IP address 0.0.0.0), the **Remote Management** function is disabled. To enable this function, please change the **Remote Management IP address** from 0.0.0.0 to a specific authorized remote IP address.

You can also change the **Web Management port** to another one if necessary, this is also a security enhancement.

Remote Management

Web Management Port:

Remote Management IP Address: (Enter 255.255.255.255 for

Step 5

Click **Save** to save the settings.

To access the Router, you should enter your Router's WAN IP address into your browser's address (in IE) or location (in Netscape) box and the custom port number. For example, if your Router's WAN address is 202.96.12.8 and you use port number 8080, enter http://202.96.12.8:8080 in your browser. You will be asked for the Router's password. After successfully entering the password, you will be able to access the Router's web-based utility.

Note:

1. Type a specific Public IP address for the Remote Management IP Address means that you can only connect to this device remotely from a computer which is using this specific IP address.
2. Type **0.0.0.0** Remote Management IP Address means that you cannot connect to this device remotely.
3. Type **255.255.255.255** Remote Management IP Address means that you can connect to the router remotely from anywhere via Internet, this is not recommended and please use it with caution.
4. We suggest changing the default log in Username and Password if the Remote Management feature is enabled, especially if you typed 255.255.255.255 as the Remote Management IP address. Please click [How do I change the Administrative username and Password](#) to view how to change them.

to know more details of each function and configuration please go to the manual of your product.
